**Bon appetit!** You are welcome to have your lunch during the performance. Switching your cell phone to **silent** is important to the performers and other members of the audience. *Bach's Inventions & Sinfonias*, also known as the *Two-part & Three-part Inventions*, are a set of 30 short compositions for keyboard. The Inventions, which were composed in Köthen, are in two-part counterpoint. The Sinfonias, which are estimated to have been completed in Leipzig, are in three-part counterpoint. These pieces were used by Bach to teach his students the keyboard, improving their playing of multiple parts. These works never made it to print in Bach's life, being published in 1801. Since then, these works have been popularly used to teach young musicians.
